Multi-view solar alarm style

Black housing with side camera modules, a lower camera head and a red top beacon.

CAM-A01

CAM-A02

Camera body and separate solar panel shown with SPM-T series packaging. The two photos illustrate different multi-view layouts; specify the layout you want when requesting a quote.

Choose the network version

Please specify 4G SIM or Wi-Fi. Confirm the exact app and network configuration for the selected unit.

Confirm the alarm functions

Tell us whether you need a beacon, audible alarm or two-way audio. We will confirm the functions for the quoted variant.

To enquire: send CAM-A01 or CAM-A02, destination country and estimated quantity.

Dual-view solar camera options

Grey housing with an upper fixed view, a lower camera head and a separate solar panel.

CAM-A03

CAM-A04

The left photo shows a unit marked 4G. The right photo shows a red-beacon exterior with dual-view packaging. Select the required exterior and confirm the network and app for that exact variant.

4G sourcing requirements

For a 4G quote, share the destination country and local mobile operator. Request the supported LTE bands and SIM requirements.

Match the viewing setup

Tell us whether you need dual-view display, remote pan/tilt or an alarm option. Confirm these with the final configuration.

To enquire: send CAM-A03 or CAM-A04, required app and order quantity.

Multi-view solar camera kit

V380 Pro / 4G version enquiry

KIT APPEARANCE

Black multi-view camera with a separate solar panel and mounting accessory shown.

This photo family corresponds to the V380 Pro 4G kit in our product selection. Please confirm the app and LTE bands for the exact unit quoted.

Before quotation

Destination and local operator

Preferred viewing layout

Required storage configuration

Quantity and packaging

Use CAM-A05 and this photo to identify the style. We will confirm the available configuration, kit contents and quotation.

WHOLESALE ENQUIRY

Tell us what you need.

A clear model reference helps us prepare a useful quote for your market.

01

Photo reference

CAM-A01 to CAM-A05, or a photo of your current model.

02

Network and app

4G SIM or Wi-Fi; required app. For 4G, add the destination country, mobile operator and required LTE bands.

03

Configuration

Viewing layout, storage, alarm functions and installation needs. Ask for the final specification sheet.

04

Order and delivery

Estimated quantity, packaging requirements, destination city or port, and preferred shipping method.

Contact for quote - dispatch from China

Liam and our Shenzhen team can quote against your selected configuration and quantity. Prices, available variants, lead time, shipping and kit contents will be confirmed in the quotation.

CAM references identify photo families for enquiries. The final model code and technical specification are confirmed with your quotation.
